## Overview

### 100 Word Product Description

Add a CORSAIR RS120 ARGB 120mm PWM Fan to your PC cooling setup. Daisy-chained connectors let you link multiple fans together and control them all through just one 4-pin PWM and one +5V ARGB header on your motherboard. Enjoy fan speeds up to 2,100 RPM, with the static pressure to also serve as radiator fans. CORSAIR AirGuide technology with anti-vortex vanes directs airflow for concentrated, powerful cooling. Eight LEDs light up your build with simple +5V ARGB motherboard control. Magnetic Dome bearings ensure quieter operation and increased longevity, while Zero RPM mode offers silent operation at low loads.

## Features

- **Streamlined Fan Connections:** Daisy-chain multiple fans together and control them all through just one 4-pin PWM connector and one +5V ARGB connector.
- **Lighting Made Easy:** Eight LEDs per fan shine bright with customizable lighting through your motherboard's built-in ARGB control (requires compatible motherboard).
- **Precise PWM Speeds:** Set your fan speeds up to 2,100 RPM while providing up to 70 CFM airflow to your system.
- **CORSAIR AirGuide Technology:** Anti-vortex vanes direct airflow at your hottest components for concentrated cooling, pushing air in the direction you need when mounted to a radiator or heatsink.
- **High Static Pressure:** RS fans work well as radiator fans with a static pressure of 2.8mm-H<sub>2</sub>O to push through obstructions.
- **Quiet Operation with Magnetic Dome Bearing:** CORSAIR's Magnetic Dome bearing minimizes noise and reduces friction for greater longevity.
- **Zero RPM Mode:** Supports Zero RPM PWM signals to completely eliminate fan noise at low loads.
